JUSTIN GOATS, WEB DEVELOPER

I started my web development journey two years ago while watching a video on HTML and CSS and I have been hooked ever since. What started out as a hobby has now become an obsession to continue to learn and code. I love to problem solve and to develop beautiful user experiences through code, it makes all the hard work worthwhile.

TECHNICAL SKILLS

- HTML5, CSS3, JavaScript, React, PHP, MySQL, SASS

EXPERIENCE

- **Banking Web App** <http://justinssoftware.com/BankOfJustin/home.html>

I created a banking application using PHP, MySQL, HTML5, CSS3, JavaScript. New users can create a new account or use an existing account to sign into their account page. From there users can either transfer funds, deposit, withdraw, or view any transactions that user has done by viewing their statements. All data is pulled and updated from a database created from PHPMyAdmin.

- **Fitness Website** <https://fitness101.neocities.org/index.html>

This is a fitness learning website created with HTML3, CSS3, and JavaScript. It uses CSS Grid and media queries to be a responsive website and JavaScript to create slideshows to guide users on using proper form when exercising.

- **Asteroid Killer** <http://justinssoftware.com/AsteroidKiller/asteroidKiller.html>

A Top-Down shooter game made using the HTML canvas with CSS and JavaScript. Made for use on Desktop.

EDUCATION

Mesa Community College
A.S. Computer Information Systems
GPA : 3.5
Credit Hours Attained : 12

2019 - present
